

ASSEMBLYAI VOICE AGENT HACKATHON 2026

EverCall

Jarvis for Grandma — A daily AI voice call for your elderly parents and a wellbeing radar for the whole family.

Powered by AssemblyAI Universal-3.5 Pro Realtime | LeMUR | Sentiment Analysis | Speaker Diarization

The Family Dashboard

The complete wellbeing radar — call status, mood analysis, 14-day trend, and family alerts in one view.

Today's Call

One-tap trigger starts a warm AI conversation with Ruth — demo mode runs entirely in the browser with simulated voice.

Wellbeing Radar

Post-call LeMUR analysis surfaces mood score, medication adherence, memory slip detection, and caregiver presence via diarization.

Mood Trend — Last 14 Days

Zero-dependency SVG sparkline tracks daily sentiment. The 14-day average gives families a clear longitudinal picture of emotional wellbeing.

Family Alerts

Instant pings when something feels off — missed medications, mood drops, or memory patterns flagged by LeMUR severity scoring.

AssemblyAI Voice Agent Hackathon

Built for the lablab.ai hackathon — September 2026. Using AssemblyAI's full suite: realtime STT, LeMUR, sentiment, and diarization.
